

IT Update

Minutes now on website

As an outcome of discussion on the regular CEO/Sport & Club Development Council Chairs teleconference, and based on members feedback, access to minutes of Sport and Club Development Council and Commission meetings is now available on the website. This is a temporary location until we transition this information to the Members' Portal.

To access this information, please go to <http://www.cams.com.au/en/Sport/Minutes.aspx> .

Register Now for Members Portal

Early bird registration for the Members' Portal has now commenced. In order to avoid the rush, you are encouraged to register your details early. This will ensure you will have immediate access when the portal goes live.

Having trouble finding things?

Several members who understandably are used to finding bits of information on the old website easily, after using it for several years, are finding it difficult to find on the new site.

If this is the case, we encourage you to go to the Sitemap prompt at the bottom right side of the home page and this will assist you to find where the information you are looking for might be. Another helpful way to find things is to use the search function at the top right of the home page. This information that you normally use will become much easier to find in the Members Portal.

Members' Portal won't restrict access to information

Some people are fearful that the introduction of the portal (which will work similar to an intranet) is to be used to censor access to some data and information within the organisation. You can be assured this is not the case and while there may be aspects of accessibility that will only be available to limited personnel (e.g. the access to misdemeanour information – the bad book – by Stewards or Board papers by Directors) the majority of information available today will continue to be available in the future. The portal will simply allow us to structure it in a better way because the system will know who you are.
